

MiAmar continuously scans news, LinkedIn posts, job postings, and public alerts about the companies you care about — competitors, customers, partners, investors — and turns that noise into a ranked feed of what actually matters **to your business**. **The core idea:** every signal is scored through the lens of your company — the same headline can be critical for one business and background noise for another. MiAmar tells you which one it is for you.

WHAT MIAMAR DOES TODAY

Continuous Monitoring

Ingests news, LinkedIn activity, job postings, and Google Alerts for every company you track — automatically, around the clock.

AI-Powered Relevance Filtering

An LLM classifies every incoming item, screening out noise and surfacing what's relevant — with full visibility into Approved vs. Filtered.

Your Arena: A Personalized Workspace

Track competitors, customers, partners, or any custom relationship. Your own categories always take priority over generic defaults.

Custom Importance Tiers

Skip generic High/Medium/Low. Define your own 4 priority tiers named around what matters to your strategy.

Intelligence Feed

A Top Signal with plain-English "why it matters," Priority and Watch items, flexible date ranges (2D–3M), and a full Events timeline.

Automatic Ghosts

Define your outcomes and periodic events, such as a Weekly newsletter, shareable via email or link — forward to leadership without giving full platform access.

Conversational Chat

Ask plain-language questions — "What has [Competitor] been up to this month?" — grounded in your Arena's data.

Trend Dashboards

Visual, velocity-based views showing how activity shifts across tracked companies and categories over time.

WHY IT'S DIFFERENT

WITHOUT MIAMAR

Manually scanning news, LinkedIn, job boards

Generic High/Medium/Low alerts

Hours of reading for 2–3 relevant stories

Static reports

One-size-fits-all intelligence

WITH MIAMAR

One ranked feed, updated continuously

Importance tiers named around your strategy

AI pre-filters relevant vs. noise, with counts

Live dashboards + auto-generated weekly newsletter

Every signal scored through your company's lens
